Escherichia coli str. K-12 substr. MG1655 producing antiEpEX-scFv · target neighborhood

Wild Type · Standard FBA; selected solution; dotted edges: zero flux

Target: scFvAA[c]

Mode: Flux-weighted **Direction: upstream** **Depth: 6**

Shown: 28 reactions **36 metabolites**

Filtered for publication readability

Legend: metabolite · extracellular · target · reaction · exchange / transport · edge width ∝ |flux|
